

Temporary Imperfections on a Finished Hardwood Floor

Allow your hardwood flooring time to fully cure and to mature. All floors tend to leave behind minor imperfections, many temporary.

We're used to these anomalies, however, we understand that the customer might be surprised by these flaws and suffer from unnecessary worry.

Many flaws and imperfections will vanish over time. When looking at your floor do it from a standing position for the correct perspective. The curing process usually will eliminate brush marks, screening marks, sheen variance and abrasions.

Give your floors 60-90 days to fully cure and mature before contacting Dave's Floor Sanding about your concerns.

For a quality commercial hardwood flooring project you can count on, Dave's Floor Sanding is the number one Floor Sanding Company in Minnesota. We offer 100% customer satisfaction - guaranteed.
